European Directives for Personal Protective Equipment

European Standard EN388 established the criteria necessary for rating all PPE items. Many of our hand protection offerings meet these standards – reflected with the CE logo – and have a 4-digit performance rating that measures abrasion, cut, tear and puncture resistance (ACTP). A glove's overall performance score is indicated by four numbers that represent the four test criteria. The higher the number, the better the performance. Manufacturers may use an X to indicate not tested.

Criteria	Rating
A Abrasion Resistance	0-4
C Blade Cut Resistance	0-5
T Tear Resistance	0-4
P Puncture Resistance	0-4

A ProFlex® 710 Heavy-Duty Utility Gloves Heavy-duty utility gloves offer superior protection for the skilled professional. Padded palm with Tena-Grip™ reinforcement for extra protection. Tena-Grip™ reinforced fingertips and thumb saddle. Technical hex-stretch material construction for long-lasting durability.
